

# WORD COORDINATES

**Materials:** Game sheet, 1 number die, 1 letter die (use sticker dots & write letters a-f on them), marker for each player in different colors

**Directions:** Roll the dice and read the word that corresponds with your roll. For example, if you roll a 7-b you would read the word “by”. Once you read the word correctly, cross it off with your marker. The next person repeats these directions, but will use a different color marker to cross off their word. If you roll the dice and the word has already been crossed off, your turn is over. Continue playing until the board is completely covered or until a predetermined amount of time has passed. The person with the most words crossed off is the winner.
