

Communications

Church Photographers and Videographers

We currently have a small dedicated team who video records Father Merchant's sermons and photographs various parish events. Having up-to-date videos and photographs to post on Facebook and/or our website is critical to letting the world know who we are and what to expect when they visit.

Phone Tree

St. Stephen's has a computer operated phone tree in order to quickly communicate important information which cannot wait for dissemination at a Church service or newsletter. The phone tree operates from the Church and calls each member with a recorded message as the need arises.

Signage

Our road sign on 11th Avenue North requires creative thought each week as disciples for Christ.

Social Media

We maintain Facebook pages for both the church and our rummage sale. Whereas our website is aimed at providing information to potential visitors and parishioners, our church Facebook page reflects what goes on in the life of our parish. Whether it is Father Merchant's sermons or pictures and comments about our various outreach efforts, musical events, social happenings, celebrations, etc. the content serves to paint a picture of who we are and what we represent.

Website

Our website www.ststephensnmb.com or Facebook is likely the first look a person gets of St. Stephen's Parish. We strive to keep this site updated, which hopefully will lead to a visit to our Church. The website is a readily available source of all kinds of information about St. Stephen's including location, service times, what to expect when you visit, a history of the church, etc. It also contains a number of links aimed at making it easier for our parishioners to access resources, such as, the church calendar that Sharon maintains, the Sunday Announcements, the Anglican News Service, The Episcopal Church in SC, etc.
